Demographia World Urban Areas

(Built-Up Urban Areas or Urban Agglomerations)
18th Annual Edition: July 2022

TECHNICAL INTRODUCTION

CONTENTS

1. Introduction
2. Highlights: 2022 Edition
3. Built-Up Urban Areas: Definitional Issues
4. Population and Land Area Estimation
5. Specific Built-Up Urban Areas
6. Caution: Trend Analysis
7. Background: *Demographia World Urban Areas*
8. Cover Illustration: New York
9. Comments and Suggestions

1. DEMOGRAPHIA WORLD URBAN AREAS: INTRODUCTION

Demographia World Urban Areas (Built-up Urban Areas or Urban Agglomerations) is the only annually published inventory of population, corresponding land area and population density for urban areas with more than 500,000 population. Unlike some other regularly produced lists, *Demographia World Urban Areas* applies a generally consistent definition to built-up urban areas.¹ Urban footprint data is reported without regard to political boundaries that are generally associated with metropolitan areas or sub-national jurisdictions. A useful definition was supplied by Alex Blei, of the NYU (New York University) Stern Marron Institute Urban Expansion Project, who described urban areas as contiguous or mostly contiguous built-up

¹ Some other urban agglomeration lists mix metropolitan areas, municipalities (parts of metropolitan areas) and urban areas (built up urban areas or agglomerations). None of these lists include urban land area data. The United Nations list is unique in providing notes that clarify the nature of its each of its listings (core cities, metropolitan areas, urban areas and others).

areas that “function as an integrated economic unit, linked together by commuting flows, social and economic interactions.”²

Demographia World Urban Areas contains population, land area and population density for the nearly 1,000 identified built-up urban areas in the world with 500,000 or more population. The total population of these urban areas is estimated at 2.36 billion, representing 52 percent of the world urban population in 2022.³ The world urban population has risen to 57 percent of the total population in 2022.

2: HIGHLIGHTS OF THE 2022 EDITION

The new decade brings updated census counts, though some censuses have been delayed due to the pandemic.

Megacities:

There are 44 megacities (urban areas of at least 10 million population) This is an increase of eight from 36 to 44. Five were in China (Chongqing, Xi'an, Zhengzhou, Dongguan and Wuhan). The other new megacities were Hyderabad (India), Lima, and Bogota. Overall, China has 11 megacities, followed by India with six, with Brazil, Japan, Pakistan and the United States each having three. There are a total of 97 urban areas with at least 5,000,000 residents, up from 90 last year.

Most Significant Urban Area Developments:

Tokyo-Yokohama: Top ranked Tokyo-Yokohama is estimated to have a lower population than reported last year. This is the result of early 2020s Ministry of Communications estimates that show lower population growth rates.

Jakarta: Second ranked Jakarta reflects a population reduction from last year, as a result of a substantially reduced growth rate between the 2015 and 2020 censuses.

China: China was also home to some of the most significant changes, both in population increases and reduced population growth.

Guangzhou-Foshan, which was ranked as the 10th largest urban area in the 2021 edition, had far faster growth than had been expected, as reflected in the 2020 census. The two prefectures (municipalities) that include the urban area added more than 8 million residents between the 2010 and 2020 censuses may be the [largest metropolitan area increase in history](#). Guangzhou-Foshan is now estimated to have a population of 26.9 million, ranking as the fourth largest urban area in the world, trailing Tokyo-Yokohama, Jakarta, and Delhi.

² Jerry Chase (2021), “Geographic Information Systems Support for Mission to the Cities: Determining Options for Quantifying Population and Spatial Boundaries for Urban Agglomerations,” *Journal of Adventist Mission Studies*: Vol. 16: No. 2, 180-202..

³ Calculated from United Nations data.

Guangzhou-Foshan is only one of three *adjacent* megacities in China's Greater Bay Area (see below). These include Dongguan, adjacent to the south of Guangzhou-Foshan, and Shenzhen adjacent to the south of Dongguan.

At the same time, Shanghai and Beijing, with metropolitan area increases of seven and six million respectively between 2000 and 2010 nearly stopped growing in the middle 2010s. In both places, a public policy objective is to limit population growth. This became evident in mid- 2010s decade, with municipality reports indicating much lower growth rates (See related article: *Beijing and Shanghai Limit Population Growth*⁴).

The Meaning of 57% Urban

In recent years, the world has become more than one-half urban for the first time in history (57 percent in 2022). Yet, it would be a mistake to believe that the world's urban residents live in settings similar to 5th Avenue in New York or within the fourth ring road of Beijing or in inner Paris, or for that matter in large urban areas. Virtually all of the world's large urban areas have extensive suburbs of much lower density outside the historic cores that are characterized by higher densities. Moreover, some urban areas that largely developed after post-World War II, with its preponderance of an automobile oriented urban form, have little or no high-density urban core (See: *What is a Half-Urban World?*⁵)

Median Resident: In 2022, the median world urban resident⁶ lives in an urban area with a population of approximately 625,000. This would include for example, Springfield, MA-CT in the United States as well as Wroclaw, Poland, Geneva, Puyang, Henan, China and Jeonju, South Korea.

3. BUILT-UP URBAN AREAS: DEFINITIONAL ISSUES

There is considerable confusion about urban definitions, as is discussed below

3.1. What is a Built-Up Urban Area?

Built-up urban areas are *not* metropolitan areas.

An urban area ("built-up urban area,"⁷ urbanized area or urban agglomeration)⁸ is a continuously built up land mass of urban development that is *within* a labor market (metropolitan area or metropolitan region). An urban area contains *no* rural land (all land in the world is either urban or rural). In some nations, the term "urban area" is used, but does not denote a built-up urban area.⁹

⁴ Wendell Cox, (2019), "Beijing and Shanghai Limit Population Growth," *The New Geography*, <http://www.newgeography.com/content/006258-beijing-and-shanghai-limit-population-growth>.

⁵ Wendell Cox (2012), "What is a Half-Urban World," *The New Geography*, <http://www.newgeography.com/content/003249-what-a-half-urban-world>.

⁶ Where one half of the world population lives in larger or smaller urban areas.

⁷ "Built up urban area" is the new urban area term now used by National Statistics in the United Kingdom. It may be the most descriptive short term for urban areas.

⁸ Called a "population centre" in Canada and an "urban centre" in Australia.

⁹ For example, in China, sub-city or sub-regional districts called "shixiaqu" (市辖区) are sometimes referred to as urban areas. Shixiaqu resemble metropolitan areas, containing both urban and rural land. Districts designated as urban often have large tracts of rural land on which urban development is anticipated.

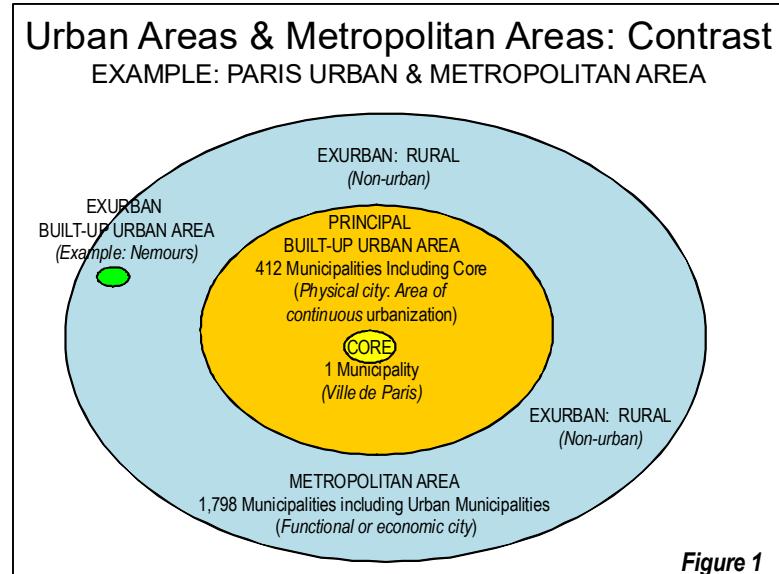

An urban area is best thought of as the “urban footprint” --- the lighted area (“city lights”) that can be observed from an airplane (or satellite) on a clear night.

By necessity, average population density data masks significant variations within urban areas. Within urban areas, urban population densities can range from below 400 per square kilometer (1,000 per square mile), particularly in North American urban areas, to over 1,000,000 per square kilometer (2,500,000 per square mile) in informal neighborhoods¹⁰ of some Asian urban areas, such as Dhaka (See: *The Evolving Urban Form: Dhaka*).¹¹

Varying densities within urban areas are illustrated by comparing the Phoenix and Boston urban areas. Phoenix is at least 60 percent denser than the Boston-Providence urban area. Yet, the highest small area population densities within Boston-Providence are at least five times that of the highest density areas in Phoenix. Moreover, Boston-Providence has a far larger commercial core (“central business district” or “downtown”). The difference is that the Phoenix suburbs are denser than the Boston-Providence suburbs.

Higher density suburbs are also responsible for making Los Angeles the most densely populated large urban area in the United States, despite its much lower urban core densities relative to New York (See: *California’s Dense Suburbs and Urbanization*¹²). This creates an irony that the city most associated with urban dispersion (“urban sprawl”) in the United States is, in reality, the least dispersed (least “sprawling”). At the same time, no urban area in the world sprawls over a larger area than New York, as is indicated in Schedule 3.

Similarly, London and Athens have similar population densities. Yet, the core densities in Athens are considerably higher than in London. The Athens suburbs, however, are among the least dense in the high-income world. The Essen-Dusseldorf and Milan urban areas have almost identical densities, yet core densities are considerably higher in Milan. *Demographia World Urban Areas* reports the estimated population and density of entire urban footprints, regardless of their internal density profiles.

¹⁰ Called slums, shantytowns or favelas in various geographical areas.

<http://www.newgeography.com/content/003004-evolving-urban-form-dhaka>.

¹² See: Wendell Cox (2018), “California’s Dense Suburbs and Urbanization,” *The New Geography*,

<http://www.newgeography.com/content/005908-californias-dense-suburbs-and-urbanization>.

3.2: Urban Areas Contrasted with Metropolitan Areas

An urban area (built-up urban area or urban agglomeration) is fundamentally different from a metropolitan area. A metropolitan area is a labor market (and a housing market). It includes a principal built-up urban area (the largest built-up urban area in the metropolitan area) as well as economically connected rural areas (and smaller urban areas) to the outside. (Figure 1).¹³

Urban areas draw employees from a labor market area larger than the area of continuous development. For example, INSEE, the census authority of France defines the Paris urban area ("unité urbaine") as 2,845 square kilometers and the Paris metropolitan area (aire urbaine) as 17,100 square kilometers, indicating that more than 80 percent of the land area is outside the Paris urban area (See: *The Evolving Urban Form: Paris*¹⁴). Similarly, in the United States, 52 metropolitan areas with more than 1,000,000 population in 2010 had only 19 percent of land in urban use, with the remainder of 81 percent being rural (See: *Rural Character in America's Metropolitan Areas*¹⁵).

Because of the fundamental differences between urban areas (or urban agglomerations) and metropolitan areas, population comparisons should be made only within the two categories, not between. To mix the two is akin to comparing "apples and oranges."

3.3: Metropolitan Area Densities are Urban and Rural Densities

Metropolitan area densities can be calculated, but are *not* urban densities. Virtually *all* metropolitan areas are composed primarily of rural land, which is by definition not urban.

Moreover, comparing metropolitan densities areas is fraught with difficulty, because (1) there are no international standards for delineating metropolitan areas, rendering them non-comparable between nations and (2) geographical "building blocks" may be too large to reasonably estimate the geographical extent of the commuting sheds that are metropolitan areas.

Even within nations, comparison of metropolitan area densities can be invalid. This is illustrated by metropolitan areas in the United States, where counties are used as the building blocks. The size of counties in the United States varies up to 1,500 times and, as a result, metropolitan densities are strongly influenced by the densities of the rural areas surrounding the built-up urban areas. The metropolitan area with the largest land area in the United States is Riverside-San Bernardino, at 27,300 square miles (71,000 square kilometers). This is nearly as large as Austria. Most of this area is well beyond commuting range, which means that Riverside-San Bernardino is much larger than its genuine labor or housing market. The situation is similar, but not as extreme in some other metropolitan areas of the United States. Metropolitan area densities in the United States therefore cannot be compared with sufficient precision. Using metropolitan area densities as an urban density variable so imprecise as to distort multivariate analyses (including regression analyses).

¹³ All land is that is not urban is rural.

¹⁴ Wendell Cox (2018), "The Evolving Urban Form: Paris," *The New Geography*, <http://www.newgeography.com/content/005912-the-evolving-urban-form-paris>.

¹⁵ Wendell Cox (2013), "Rural character in America's Metropolitan Areas," *The New Geography*, <http://www.newgeography.com/content/004088-rural-character-america-s-metropolitan-areas>.

3.4: Urban Areas Contrasted with Municipalities (Cities or Communes)

An urban area is different from a municipality (also called a city, city proper, or a local government authority). Municipalities have political boundaries that usually constitute only a part of the urban area. For example, the city of Seoul represents less than one-half of the population (and a declining proportion) of the Seoul-Incheon urban area, which extends well beyond the municipality. On the other hand, a municipality may be considerably larger than an urban area and therefore contain considerable non-urban (or rural) territory. Zaragoza, Spain is an example. A large part of the municipality of Mumbai is rural, composed of the Rajiv Gandhi National Park and thus not included in the urban area.

The translated term "city" is generally used to denote sub-provincial (or in some cases provincial) government areas in China. These were formally referred to as "prefectures." Generally, they include rural areas and extend far beyond their built-up areas (such as Beijing, Tianjin, Wuhan and Guangzhou). The city of Chongqing, which has the largest population of any entity called a city (municipality) in the world stretches far beyond any reasonable definition of a metropolitan area as a commuting shed. Like the Riverside-San Bernardino metropolitan area, Chongqing covers a land area similar to that of Austria. Most of the municipality is well beyond the commuting range of the urban area.

The Chinese term "shi" is popularly translated as "city" in English. Chinese "shi" and equivalent terms are divisions of divisions of provinces or province equivalent. China is divided into more than 3,000 "shi" (including equivalent geographical units) which are similar in number to the more than 3,000 counties (including equivalent geographical units) of the United States. France has more than 30,000 communes, with most of their respective land areas typically being rural.

3.5: Adjacent and Nearby Urban Areas

This report defines urban areas as within single labor markets (as an "integrated economic unit, linked together by commuting flows"). As a result, where urban areas have grown together but are in more than one labor market are considered "adjacent urban areas." Each component urban area is separately listed.

Examples of adjacent urban areas follow:

- The Greater Bay Area (Pearl River Delta) urban areas of Shenzhen, Dongguan, Zhongshan, Jiangmen, Huizhou, Zhuhai, Guangzhou and Foshan in China's Guangdong province are very close to one-another and in some cases the built-up urban areas are virtually adjacent. Yet, this is not considered a single urban area because commuting requires too much time to be practical at this time. However, *Demographia World Urban Areas* considers Guangzhou and Foshan a single urban area. Guangzhou and Foshan have become more economically integrated than the other urban areas, as evidenced by the comprehensive expressway system and the Metro system that serves both urban area. Otherwise, each of the other urban areas in the Pearl River Delta economic region is considered to be separate. The Hong Kong and Macau urban areas also the adjacent urban areas of Guangdong. See: *Ultimate City: Guangdong-Hong Kong-Macau Greater Bay Area (with Photographic Tour)*.¹⁶

¹⁶ Wendell Cox (2018), "Ultimate City: Guangdong-Hong Kong-Macau Greater Bay Area (with Photographic Tour)," *The New Geography*, <http://www.newgeography.com/content/006132-ultimate-city-guangdong-hong-kong-macao-greater-bay-area-with-photographic-tour>.

- The Yangtze River Delta (broadly defined to include Hangzhou Bay) contains a number of nearby urban areas stretching from Zhoushan/Ningbo to Shanghai, and Nanjing. This includes the municipalities (prefectures) of Zhoushan, Ningbo, Shaoxing, Hangzhou, Jiaxing, Shanghai, Suzhou, Wuxi, Changzhou, Zhenjiang, Nanjing and other smaller urban areas. Adjacent urban areas in the Yangtze River Delta extend from Shanghai, through Suzhou and Wuxi to Changzhou. There are two other adjacent urban areas, Hangzhou and Shaoxing as well as Ningbo and Zhoushan. There is rural territory between Changzhou and Zhenjiang, and between Zhenjiang and Nanjing, Shanghai and Hangzhou as well as between Shaoxing and Ningbo. Plans call for significant transport improvements that could combine some of these adjacent urban areas into single urban areas in the future.
- The coast of Japan from Tokyo-Yokohama to Osaka-Kobe-Kyoto has nearly “grown together.” Yet, this ribbon of urbanization is far too expensive to be a single urban area (labor market).
- The same applies to the Northeastern “megalopolis” of the United States. There is continuous development from the Philadelphia urban area, through the New York urban area, to the Hartford urban area. This continuous urbanization is considered as separate built-up urban areas because there are three labor markets (metropolitan areas), New York, Philadelphia and Hartford.

3.6: International Urban Areas

Urban areas (and metropolitan areas) are confined to a single nation, unless there is virtual freedom of movement (principally labor) between the adjacent nations (or jurisdictions). Freedom of movement means that there are no customs or immigration facilities at borders, or that there are arrangements (such as readily available permits) for residents to live and/or work in any of the adjacent jurisdictions. Currently, this condition is met only between some continental nations of the European Union. For example, the Lille urban area is in both France and Belgium yet is considered a single urban area because there is freedom of labor movement without trade, immigration or customs barriers. Treaty provisions render Geneva (Switzerland)-Annemasse (France), Basel (Switzerland) along with suburban areas of France and Germany as a single built-up urban area. Similarly, Milan together with Chiasso in Switzerland is a single built-up urban area (Table 1)

| Table 1 International Urban Areas | |
|--|-----------------------------------|
| <i>Urban Area</i> | <i>Part of Urban Area Also In</i> |
| Aachen, Germany | Netherlands |
| Basel, Switzerland | France & Germany |
| Geneva, Switzerland | France |
| Lille, France | Belgium |
| Milan, Italy | Switzerland |

However, Detroit-Windsor, El Paso-Ciudad Juarez and San Diego-Tijuana are not considered single urban areas because border controls restrict the free movement of labor. In China’s Greater Bay Area (Pearl River Delta), the Macao and Hong Kong urban areas are considered separate from those in Guangdong province due to the international-style border between the jurisdictions.

3.7: Combined Urban Areas

In the United States, single labor markets can be either metropolitan areas (MSAs), or combined statistical areas (CSAs), which are, overlapping metropolitan areas or metropolitan regions, with somewhat weaker commuting interchanges.¹⁷ Where continuous urban footprints exist within CSA. *Demographia World Urban Areas* combines them into a single built-up urban area. For example, the New York built-up urban area stretches from New York to other US Census Bureau defined urban areas, such as Bridgeport-Stamford, New Haven, and Trenton and others (Table 2).

In addition, the US Census Bureau has retained some urban areas, despite their now continuous urbanization with other urban areas within the same metropolitan areas.¹⁸ *Demographia World Urban Areas* combines them into a single built-up urban area. Cleveland and Lorain, Ohio and Orlando and Kissimmee, Florida are examples of this (Table 2).

In Canada, where the national census authority (Statistics Canada) defines metropolitan areas, the Toronto, Hamilton and Oshawa metropolitan areas are also considered a single labor market and are combined into a single combined urban area. While Canada does not designate combinations of metropolitan areas, Statistics Canada has indicated that if criteria similar to that of the United States were applied the Toronto, Hamilton and Oshawa metropolitan areas, they would constitute a combined metropolitan area.¹⁹ Further, the area is served by an extensive freeway system providing access to jobs throughout the urban area and frequent suburban rail service keying on the Toronto CBD

In Australia, the Brisbane, QLD and Gold Coast, QLD-NSW urban areas have been combined into the Brisbane-Gold Coast, QLD due to the contiguity of the urban development extensive motorway system providing access to jobs throughout the urban area and frequent suburban rail service keying on the Brisbane CBD. All of this justifies considering this urban area a single labor market.

Other adjacent urban areas are combined in nations that do not report built-up urban area data. For example, Guangzhou and Foshan, Tehran and Karaj as well as Johannesburg and Pretoria are combined because of strong transport links that justify consideration as a single labor market.

4. POPULATION AND LAND AREA ESTIMATION

There are now multiple sources for population estimates within urban area polygons. A review of the available sources has found the Commission Global Human Settlement (GHS2015) 250 meter database to be the most appropriate for the purposes of *Demographia World Urban Area* population estimation.²⁰

¹⁷ Metropolitan areas require a 25 percent employment interchange between constituent counties (US metropolitan areas are no longer based on central municipalities, but now use "central counties"). Combined statistical areas require a 15 percent employment interchange between metropolitan areas.

¹⁸ United States Census Bureau (2011), "Urban Area Criteria for the 2010 Census," *The Federal Register*, <https://www2.census.gov/geo/pdfs/reference/fedreg/fedreg76n164.pdf>.

| United States | SAN FRANCISCO-SAN JOSE, CA: San Francisco, Concord, Livermore, Napa, San Jose, Vallejo |
| United States | SEATTLE, WA: Seattle, Bremerton, Indianola, Marysville |
| United States | ST. LOUIS, MO-IL: St. Louis, Alton (IL-MO) |
| United States | WASHINGTON-BALTIMORE, DC-VA-MD: Washington, Baltimore, Waldorf (MD) |

A combined urban area is adjacent urban areas located within the same labor market area (U.S. Combined Statistical Area) or equivalent.

Some census authorities report urban area population and land area data relatively consistent with international practice. This includes, for example, Australia, Canada, Denmark, Finland, the Netherlands, Norway, Sweden, and the United Kingdom and the United States. The *Demographia* estimates are based on that data in most cases and also in Paris (France). The source of such estimates is shown in the column labeled "B" in Schedules 2-5.

It is not possible to precisely coordinate the population and land area for the reporting year. Therefore population density estimates should be considered approximate, despite the fact that they are reported precisely from the data used.

The current year population estimate is modeled from the base year population, adjusted by population projections between the base year and the current year (Table 3). Most population projection annual percentages are derived from United Nations data.

| Table 3 Basis Codes: Population and Land Area (Column B in Schedules 2-5) | |
|--|--|
| Code | Basis of Land Area or Base Year Population Estimate |
| 1 | Demographia Estimate based on GHS2015 |
| 2 | Demographia Estimate based on national census authority data or other sources. |

5: SPECIFIC BUILT-UP URBAN AREAS

Table 4 below notes identify some additional components of urban areas that (1) might be thought to be separate urban areas, or (2) may be classified separate by statistical agencies or are (3) listed to indicate to better describe the geography of an urban area. Urban areas include many more components that are not indicated in Table 4. For example, the Paris urban area has more than 400 municipal jurisdictions (communes) and the Paris metropolitan area ("aire urbaine") [has nearly 1,751](#). The New York metropolitan area [has 566 municipalities](#).

6. CAUTION: TREND ANALYSIS

Demographia World Urban Areas is a continuing project and attempts to provide "state of the art" data. Revisions are made as more accurate satellite photographs and population estimates become available. As a result, *Demographia World Urban Areas* is not intended for trend analysis.

Year-to-year changes indicated in population and land area may merely reflect better data that was not available before and may not, therefore indicate a trend. Moreover, the current year population estimates are a projection from a base year. Changes in population projection rates can result in substantial current year population estimates rather than changes in actual population. The purpose is to provide the best current population estimates.

Population and land area base data is updated as new data is obtained.

| Table 4 Specific Urban Areas: Notes | |

| Detroit, MI, USA | Not combined with Windsor: (International Border Controls: Not a labor market), Combined urban area. Includes Detroit, Ann Arbor & South Lyon |
| Dhaka, Bangladesh | Nayaranganj included. |
| Dongguan, Guangdong, China | 2010 census population was well below previous local estimates |
| Dongyang, ZJ, China | Included in Yiwu (Jinhua) |
| Dover, NH-ME urban area, USA | Included in Boston-Providence |
| Dubai, UAE | Includes Sharja |
| Durham, NC urban area, USA | Included in Raleigh |
| Ejin Horo, NM, China | Includes Kangbashi |
| El Paso, TX urban area, USA | Not combined with Ciudad Juarez: (International Border Controls: Not a labor market) |
| Ezhou, Hubei, China | Includes Huangzhou (Huanggang). |
| Faridabad, Haryana, India | Included in Delhi. |
| Foshan, Guangdong, China | Included in Guangzhou-Foshan |
| Francisco Morato, Sao Paulo, Brazil | Included in Sao Paulo |
| Fuchu, Japan | Included in Fukuyama |
| Fukuoka, Fukuoka, Japan | Shown as a separate urban area. Some sources combine Fukuoka with Kitakyushu (such as the United Nations). |
| Fukuyama, Japan | Includes Fuchu & Kasaoka |
| Fushun, LN China | Included in Shenyang |
| Gainesville, GA urban area, USA | Included in Atlanta |
| Gama, GO Brazil | Included in Brasilia |
| Ganzhou, JX, China | Includes Nankang |
| Gaogang, Jiangsu, China | Included in Taizhou |
| Gastona, NC urban area, USA | Included in Charlotte |
| Geneva, Switzerland | Extends into France |
| Gezbe, Turkey | Included in Istanbul |
| Ghaziabad, Uttar Pradesh, India | Included in Delhi. |
| Gongjing, SC, China | See Zigong |
| Guangzhou-Foshan, Guangdong, China | Includes Foshan |
| Gujranwali, Pakistan | Includes Kamoki |
| Gurgaon, Haryana, India | Included in Delhi. |
| Haarlem, Netherlands | Included in Amsterdam. |
| Hague, Netherlands | Included in Rotterdam-Hague |
| Hamilton, ON urban area, Canada | Included in Toronto. |
| Hebi, Henan, China | Includes Qi |
| Heerlen, Netherlands | Included in Aachen, Germany. |
| Helan, NX China | Included in Yinchuan |
| Himeji, Hyogo, Japan | Included in Osaka-Kobe-Kyoto. |

Table 4
Specific Urban Areas: Notes

| | |
|--|---|
| Hitachi, Japan | Included in Mito. |
| Hong Kong, China | Not combined with Shenzhen: (Border Controls: Not a labor market) |
| Houston, TX urban area, USA | Combined urban area. Includes Conroe & Texas City |
| Huangmei (Huanggang), HUB | Included in Jiujiang, JX. |
| Huangshui, HUB | Includes Daye (county level city) |
| Huangzhou (Huanggang), Hubei, China | Included in Ezhou. |
| Hubli, West Bengal, India | Does not include Dharwad. |
| Huiyang qu (Huizhou), Guangdong, China | Included in Shenzhen. |
| Huizhou, Guangdong, China | Huicheng qu only |
| Ikorodo, Nigeria | Included in Lagos |
| Incheon, South Korea | Included in Seoul-Incheon, |
| Indianola WA urban area, USA | Included in Seattle |
| Istanbul, Turkey | Includes Gezbe |
| Jakarta, Indonesia | Higher estimate than other sources (such as the United Nations), which are largely limited to DKI Jakarta. Continuous urbanization extends into Tangerang, South Tanerang, Borgor, Bekasi and Karawang. |
| Jianbizhen (qu), China | Included in Zhenjiang, JS |
| Jiangyin (Wuxi), GD, China | Included in Zhangjiaggang (Suzhou) JS |
| Jianshan, HL China | Included in Shuangyashan |
| Jinjiang, Fuzhou, China | Included in Quanzhou. |
| Jiujiang, JX, China | Includes Huangmei (Huanggang), HUB. |
| Jixian, HL China | Included in Shuangyashan |
| Kalyan, Maharashtra, India | Included in Mumbai (beginning in 2016). |
| Kamoki, Pakistan | Included in Gujranwali |
| Kangbashi (Ordos), NM, China | Includes Ejin Horo |
| Kansas City, MO-KS, USA | Combined urban area. Includes Kansas City (MO) & Lee's Summit (MO-KS) |
| Karaj, Iran | Included in Tehran. |
| Karawang, Indonesia | Included in Jakarta |
| Kasaoka, Japan | Included in Fukuyama |
| Kashi, XJ, China | Includes Shule |
| Kenosha, WI, USA | Included in Chicago. |
| Kissimmee, FL urban area, USA | Included in Orlando. |
| Kitakyushu, Fukuoka, Japan | Shown as a separate urban area. Some sources combine Kitakyushu with Fukuoka (such as the United Nations), which is not a part of the continuous urbanization of Kitakyushu. |
| Kuala Lumpur, Malaysia | The population is higher other agglomeration estimates (such as the United Nations), which does not include all of the continuously developed urban area. Includes Port Klang. |

Table 4
Specific Urban Areas: Notes

| | |
|-----------------------------------|---|
| Kulim, Malaysia | Included in Penang |
| Kwamba, Nigeria | Included in Abuja |
| Lagos, Nigeria | Includes Ikorodo & Loburo |
| Lee's Summit, MO urban area, USA | Included in Kansas City |
| Leiden, Netherlands | Included in Rotterdam-Hague |
| Leon, Mexico | Includes Silao |
| Leominster, MA urban area USA | Included in Boston-Providence |
| Lille, France | Extends into Belgium (single labor market) |
| Livermore, CA urban area, USA | Included in San Francisco-San Jose |
| Loburo, Nigeria | Included in Lagos |
| Lorain, OH urban area, USA | Included in Cleveland |
| Los Angeles, CA urban area, USA | Combined urban area. Includes Riverside-San Bernardino and Mission Viejo urban areas |
| Luziana, GO Brazil | Included in Brasilia |
| Manchester, VT urban area, USA | Included in Boston-Providence |
| Manila, Philippines | Higher than other estimates, which are largely limited to the National Capital Region. Continuous urbanization extends into Cavite, Laguna, Bulacan and Rizal. |
| Maputo, Monzambique | Includes Matola. |
| Marseille, France | Demographia land area estimate used, because INSEE definition includes a large rural component. |
| Marysville, WA urban area, USA | Included in Seattle |
| McKinney, TX, USA | Included in Dallas-Fort Worth. |
| Meixian, Shaanxi, China | Included in Baoji |
| Mersin, Turkey | Includes Tarsus |
| Miami, FL, USA | Includes the former urban areas of Fort Lauderdale and West Palm Beach, which have been incorporated by the US Census Bureau. |
| Milan, Italy | The population is higher than other agglomeration estimates (such as the United Nations), which does not include all of the continuously developed urban area, which stretches well into Como, Lecco and Varese provinces. Extends into Switzerland (single labor market). Includes Chiasso, Switzerland. |
| Mission Viejo urban area, CA, USA | Included in Los Angeles. |
| Mito, Japan | Includes Hitachi |
| Moscow, Russia | Demographia is indebted to Richard Forstall, who has provided local authority area population data for portions of Moscow Oblast within the Moscow urban areas. Other estimates (such as the United Nations estimate) largely limited to the municipality of Moscow, |
| Mumbai, Maharashtra, India | Includes Kalyan, and the Panvel urban area. As of 2016, also includes the Census of India urban areas of Bhiwandi, Kalyan, |

| Zigong, SC, China | Also known as Gongjing |
| <i>Notes indicating inclusion are for geographical illustration only and are not intended to be a comprehensive description of urban area components. All components (urban areas) of "Combined urban areas" are indicated.</i> | |

5: BACKGROUND: DEMOGRAPHIA WORLD URBAN AREAS

Demographia World Urban Areas was established to offer consistency urban density analysis, in hopes of replacing anecdotal comparisons between cities that are often invalid. The built-up urban area is the only level at with sufficient data to estimate the densities of the urban organism at anything approximating international standards.

Demographia World Urban Areas was the first source to identify the under-estimation of population in some of the world's largest urban areas. For example, *Demographia*'s early estimates of the Jakarta, Delhi, Manila, Seoul, and Kuala Lumpur urban area populations were far higher than reported by others at the time. Other sources have since revised their estimates upward.

Some of the earlier, lower estimates by other sources were, in actuality, municipal estimates that did not sufficiently take into consideration the spread of urbanization beyond the core city limits or other geographical limits. *Demographia*'s larger population estimates were the result of actual satellite map examination of the urban form. Similarly, in many cases, *Demographia*'s estimates have been lower than reported elsewhere for the same reason --- some other urban area estimates have included rural areas, which, by definition, are not urban.

6: COVER ILLUSTRATION: BROOKLYN, LOWER MANHATTAN, JERSEY CITY AND BEYOND

The cover illustration shows two historic central business districts in New York City. At the bottom of the page is downtown Brooklyn. Across the Brooklyn Bridge, the left most bridge over the East River, is Lower Manhattan (or downtown), then across the Hudson River is Exchange Place,²¹ a modern edge city located in Jersey City, New Jersey. Beyond Exchange Place, the Pulaski Skyway is evident. This viaduct was one of the first limited access roads in the United States (1932) and carries US (non interstate) routes 1 and 9 to the Holland Tunnel, accessing Lower Manhattan.

Demographia World Urban Areas estimates the population of the New York urban area at 21.5 million residents in 2022, 8.5 million of whom live in the core municipality of New York City. See *The Evolving Urban Form: Greater New York Expands*.²²

New York is the most geographically expansive (sprawling) urban area in the world, covering 4,700 square miles or 12,100 square kilometers. The New York urban area has a population density of 4,600 per square

²¹Wendell Cox (2019), “A Walk Around Jersey City’s Exchange Place,”

²² Wendell Cox (2013), “The Evolving Urban Form: Greater New York Expands,’ The New Geography,

<https://www.newgeography.com/content/004095-the-evolving-urban-form-greater-new-york-expands#:~:text=The%20term%20E2%80%9CGreater%20New%20York,at%20least%20for%20the%20city.>

mile or 1,700 per square kilometer, ranking third in the United States behind the Los Angeles urban area at 6,200/2,400 and the San Francisco-San Jose urban area at 5,700/2,200. For more information, see: *Comparing Urban Densities: Winnipeg and New York*.²³

10: COMMENTS AND SUGGESTIONS

Demographia wishes to produce the most accurate possible estimates. This edition incorporates changes from suggestions considered to be appropriate. Comments, suggestions, criticism and data are welcomed.
